

Conundrum

Artificial Intelligence for Factories

Konstantin Kiselev kk@conundrum.ai

Who we are

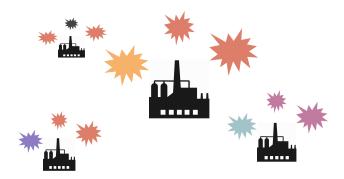

We solve predictive maintenance and processes optimization problems of industries using data from sensors

We help factories transform to industry 4.0 powered by AI

Various industries are facing a myriad of problems

Each process and each system are unique

Creating customized solution for each process is time-consuming and requires lots of resources

Challenge

Various industries are facing a myriad of problems

Each process and each system are unique

Creating customized solution for each process is time-consuming and requires lots of resources

All factories have **continuous** processes

They involve complex equipment that generates **a lot of data**

Data

Equipment

Now and next

Proven track record in metal and paper production

14 successful pilots in metal, pulp&paper, chemical, oil&gas

Strategic partnership:

McKinsey &Company

Member of NVIDIA DLI:

We help factories transform to

whole production process
