**Removes the guesswork from building...
...and updating**

The Future of Work IS *Intelligent Transformation*

VISUAL WORKSPACE

Modern workers expect capable workspaces to match increasing speed of business.

MOBILITY

The workplace of the future is untethered. It is “wherever you want to work”.

COLLABORATION

Teams are distributed far and wide. Connected workplace is a business imperative.

LARGE DATA INTERACTIVE HPC

Intelligent endpoints are driving exponential growth in data size and complexity.

VR

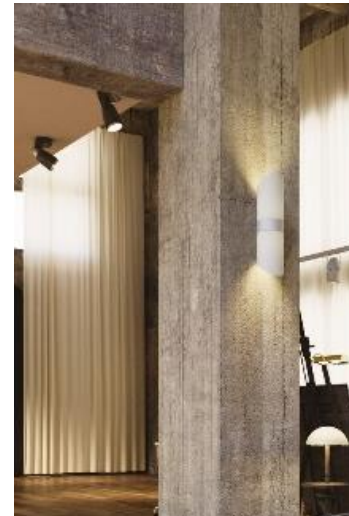

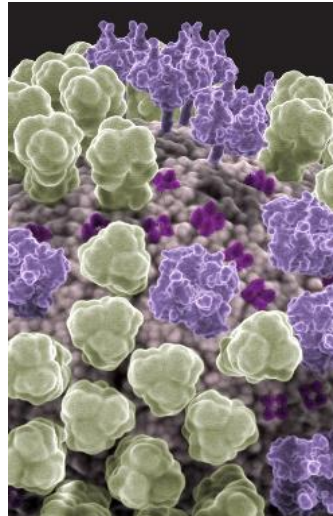

Visualization is a given. Immersion is the competitive advantage.

PHOTOREALISM

Seeing the future in physically accurate form before it happens is a game changer.

AI

Deep Learning is fueling Generative Design and the “Future Of Making Things”.
